MPC ACTION AND DISPOSITION

Planner In Charge: Dan Kelly
Staff Recomm. (Abbr.): APPROVE variance 1 because the site's topography restricts compliance with the Subdivision Regulations, and the proposed variance will not create a traffic hazard

APPROVE the concept plan subject to 10 conditions
Staff Recomm. (Full):
1. Meeting all applicable requirements of the Knox County Dept. of Engineering and Public Works.
2. Obtaining TDOT approval before constructing the southbound left turn lane and the north bound deceleration lane as shown on the plan.
3. Reconstruct Old Andersonville Pk. to intersect with Road A as shown on the plan subject to the requirements of the Knox County Dept. of Engineering and Public Works.
4. Place a note on the final plat that all lots will have access from the internal street system only.
5. Add the sidewalks to the typical road cross section. Note that sidewalks will be a minimum of 4' wide with a 2' planting strip between the back of curb and the sidewalk and state that all sidewalk construction will comply with the requirements of the Americans With Disabilities Act.
6. Dedication of the required right-of-way equal to 30' from centerline along the Andersonville Pk. frontage.
7. Obtaining a street connection permit from the Tenn. Dept. of Transportation.
8. Meeting all requirements of the previously approved concept plan and use on review development plan (5-SE-04-C & 5-I-04-UR)
9. Connection to sanitary sewer and meeting all other applicable requirements of the Knox County Health Dept.
10. A final plat based on this concept plan will not be accepted for review by MPC until certification of design plan has been submitted to MPC staff.

Comments: A concept plan and use on review were approved for this site in May of this year. That plan proposed a detached single family subdivision that would contain 239 lots. This applicant is proposing a 238 unit project that will be made up of a combination of attached and detached residential units. The proposed development of this project is 3.19 du/ac. The zoning of the site will support up to 4 du/ac.

When the previously approved plan was being considered by MPC, a traffic study was produced that recommended a number of road improvements. A southbound left turn lane in Norris Freeway, a northbound deceleration lane and the reconstruction of the Old Andersonville Pk. intersection a Norris Freeway. All of these improvements are reflected on the current plan. The actual designs of these improvements will have to be prepared by the applicant and approved by the Knox County Dept. of Engineering and Public Works and the Tenn. Dept. of Transportation.

EFFECT OF THE PROPOSAL ON THE SUBJECT PROPERTY, SURROUNDING PROPERTY AND THE COMMUNITY AS A WHOLE

1. The proposed subdivision will have minimal impact on local services since water and sewer utilities are in place to serve this site.
2. The proposed detached single-family subdivision is consistent in use and density with the recent rezoning recommendation.

CONFORMITY OF THE PROPOSAL TO CRITERIA ESTABLISHED BY THE KNOX COUNTY ZONING ORDINANCE

1. The proposed detached and attached single-family subdivision meets the standards for development

within a PR Zone and all other requirements of the Zoning Ordinance.

2. The proposed subdivision is consistent with the general standards for the PR zone: The proposed development is consistent with the adopted plans and policies of the General Plan and Sector Plan. The use is in harmony with the general purpose and intent of the Zoning Ordinance. The use is compatible with the character of the neighborhood where it is proposed. The use will not significantly injure the value of adjacent property. The use will not draw additional traffic through residential areas.

CONFORMITY OF THE PROPOSAL TO ADOPTED PLANS

1. The proposed development is consistent with the North County Sector Plan proposal of low density residential uses. The PR zoning recommended for this site will allow a density up to 4 du/ac. At a proposed density of 3.19 du/ac, the proposed subdivision is consistent with the Sector Plan and recommended zoning density.

MPC Action: Approved

MPC Meeting Date: 10/14/2004
