MPC ACTION AND DISPOSITION

Planner In Charge:

Michael Brusseau

Staff Recomm. (Abbr.):

RECOMMEND that City Council APPROVE RP-1 (Planned Residential) zoning at a density of up to 4 du/ac.

Staff Recomm. (Full):

RP-1 zoning at up to 4 du/ac is compatible with the surrounding development and zoning pattern. RP-1 zoning also requires development plan approval by MPC at a public meeting. The proposal is consistent with both the One Year Plan and sector plan.

Comments:

NEED BASED ON SUBSTANTIALLY CHANGED/CHANGING CONDITIONS IN THE AREA OR THE COUNTY GENERALLY:

1. RP-1 at the recommended density of up to 4 du/ac is compatible with the scale and intensity of the surrounding development and zoning pattern.
2. The requested RP-1 zoning and density are similar or less in intensity to the surrounding development and zoning pattern.
3. RP-1 zoning allows the flexibility to orient the development in such a way as to maximize the use of the parcel while providing open space and staying compatible with surrounding development and zoning. Under RP-1 zoning, the developer will have the opportunity to locate structures so as to stay away from the environmentally sensitive and more sloped portions of the site. There is a blue line stream that crosses the middle of the property.
4. RP-1 zoning requires approval of a development plan by MPC prior to any construction. This will provide the opportunity for staff to review the plan and address issues such as traffic circulation, lot layout, recreational amenities, open space, drainage, types of units and other potential development concerns. It will also give the opportunity for public comment at the MPC meeting.

CONSISTENCY WITH INTENT AND PURPOSE OF THE ZONING ORDINANCE:

1. The RP-1 zone, as described in the zoning ordinance, is intended to provide optional methods of land development which encourage more imaginative solutions to environmental design problems. Residential areas thus established would be characterized by a unified building and site development program, open space for recreation, and provision for commercial, religious, education and cultural facilities which are integrated with the total project by unified architectural and open space treatment. New RP-1 zoning may be created to be developed specifically as a planned unit development.
2. Based on the above general intent, this area is appropriate for RP-1 zoning at the recommended density.

THE EFFECTS OF THE PROPOSAL:

1. Water and sewer utilities are in place to serve this site.
2. At the requested density of 4 up to du/ac, up to 26 dwelling units could be considered. If developed with detached residences, it would generate about 14 school aged children and add about 300 trips to the street system.
3. The impact on adjacent properties will be minimized through the required site plan review process, where MPC will have to review and consider approval of a development plan for the property.

CONFORMITY OF THE PROPOSAL TO ADOPTED PLANS

1. The Northwest County Sector Plan and the City of Knoxville One Year Plan both propose low density residential uses for this site, consistent with the proposal.
2. Approval of this request could lead to future requests for RP-1 zoning on other larger, A-1 zoned parcels in the area. As long as the proposed density is under 6 du/ac, the request would be consistent with the sector plan and One Year Plan proposals for low density residential uses, provided there are no constraining factors such as degree of slope or other environmental factors.

Upon final approval of the rezoning, the developer will be required to submit a concept plan/development plan prior to the property's development. The plan will show the property's proposed lot pattern and street network and will also identify the types of residential units that may be constructed. Grading and drainage plans may also be required at this stage, if deemed necessary by

the City of Knoxville Department of Engineering and MPC staff.
