File Number:	4-C-14-RZ	Related File Number:
Application Filed:	2/10/2014	Date of Revision:
Applicant:	RUFUS SMITH & COMPANY	

PROPERTY INFORMATION

 General Location:
 Southwest side Dry Gap Pike, northwest side E. Beaver Creek Dr.

 Other Parcel Info.:
 Jurisdiction:

 Tax ID Number:
 47 154
 Jurisdiction:
 County

 Size of Tract:
 25.15 acres
 Access is via E. Beaver Creek Dr., a major collector street with 18' of pavement width within 40' of right-of-way.

GENERAL LAND USE INFORMATION

Existing Land Use:	Vacant land		
Surrounding Land Use:			
Proposed Use:	Detached residential		Density: 5 du/ac
Sector Plan:	North County	Sector Plan Designation:	LDR
Growth Policy Plan:	Planned Growth Area		
Neighborhood Context:	This site is located adjacent to an established commercial node at the intersection of E. Beaver Creek Dr. and Dry Gap Pike, zoned CA and CB. To the west, along E. Beaver Creek Dr., is residential development, zoned A, RB, RA and PR.		

ADDRESS/RIGHT-OF-WAY INFORMATION (where applicable)

Street:

1731 Dry Gap Pike

Other Bus./Ord. Amend.:

MPC ACTION AND DISPOSITION				
Planner In Charge:	Michael Brusseau			
Staff Recomm. (Abbr.):	RECOMMEND that County Commission APPROVE PR (Planned Residential) zoning at a density of up to 5 du/ac.			
Staff Recomm. (Full):	PR is an appropriate zone for residential development of this site and is consistent with the sector plan recommendation for the property, which is within the Planned Growth Area on the Growth Policy Plan. The site is located adjacent to a commercial node located at the intersection of two major collector streets. Similar residential densities are developed in the immediate vicinity of the site. Higher density residential uses are located to the north, along Dry Gap Pike. The site is relatively flat, so it is appropriate for development at the upper density limit of 5 du/ac allowed within LDR designated areas on the sector plan.			
Comments:	REZONING REQUIREMENTS FROM ZONING ORDINANCES (must meet all of these):			
	 THE PROPOSED AMENDMENT SHALL BE NECESSARY BECAUSE OF SUBSTANTIALLY CHANGED OR CHANGING CONDITIONS IN THE AREA AND DISTRICTS AFFECTED, OR IN THE CITY/COUNTY GENERALLY: PR is the most appropriate residential zone that can be considered for this site, because of its flexibility in lot sizes, and the ability to cluster development in the more suitable areas of the site. Beaver Creek traverses through the northerm portion of the site with F (Floodway) zoning. No development will be permitted within the F-zoned area and there will be restrictions on how the larger floodplain area within the site may be developed. PR zoning is an extension of zoning from the east and the density requested is consistent with the sector plan proposal for the property. There are several PR zoned developments in the surrounding area with similar or higher densities. The PR zone requires use on review approval of a development plan by MPC prior to construction. This will provide the opportunity for staft to review the plan and address issues such as traffic circulation, lot layout, recreational amenities, drainage, types of units and other potential development concerns. It will also give the opportunity for public comment at the MPC meeting. THE PROPOSED AMENDMENT SHALL BE CONSISTENT WITH THE INTENT AND PURPOSE OF THE APPLICABLE ZONING ORDINANCE: PR zoning is intended to provide optional methods of land development which encourage more imaginative solutions to environmental development shall be compatible with the surrounding or adjacent zones. Such compatibility shall be determined by the Planning Commission by review of development plans. Staff maintains that PR is the most appropriate zone for proposed development of this site. THE PROPOSED AMENDMENT SHALL NOT ADVERSELY AFFECT ANY OTHER PART OF THE COUNTY, NOR SHALL ANY DIRECT OR INDIRECT ADVERSE EFFECTS RESULT FROM SUCH AMENDMENT: PR zoning at the recommended density will allow the			

	3. If the proposed	development generates mo	pre than 750 trips per day, which is likely, then a traffic	
	 impact study will be required to be submitted and reviewed along with the development plan. Any recommended road improvements, resulting from the review of the development and traffic study will need to be addressed prior to the issuance of any occupancy permits for the project. PR zoning at the recommended density is compatible with the scale and intensity of the surrounding development and zoning pattern. Public water and sanitary sewer utilities are available in the area, but may need to be extended to serve the site. 			
	 THE PROPOSED AMENDMENT SHALL BE CONSISTENT WITH AND NOT IN CONFLICT WITH THE GENERAL PLAN OF KNOXVILLE AND KNOX COUNTY, INCLUDING ANY OF ITS ELEMENTS, MAJOR ROAD PLAN, LAND USE PLAN, COMMUNITY FACILITIES PLAN, AND OTHERS: 1. The North County Sector Plan designates this site for low density residential uses, consistent with the proposed PR zoning and density. 2. The site is located within the Planned Growth Area on the Knoxville-Knox County-Farragut Growth Policy Plan map. 3. This request may lead to future requests for PR zoning in the future on other A-zoned properties in the area, consistent with the sector plan proposal for the area. 			
	Upon final approval of the rezoning, the developer will be required to submit a concept plan/use on review development plan prior to the property's development. The plan will show the property's proposed lot pattern and street network and will also identify the types of residential units that may be constructed. Grading and drainage plans may also be required at this stage, if deemed necessary by Knox County Engineering and MPC staff.
